Articles

AI in Education

"An Authoring System for Intelligent Procedural-Skill Tutors," Neil C. Rowe and Thomas P. Galvin, No. 3, May/June, pp. 61–69.

AI in Health Care

"AI for Public Health: Self-Screening for Eye Diseases," Xiaohui Liu, Gongxian Cheng, and John X. Wu, No. 5, Sept./Oct., pp. 28–35.

"Better, More Cost-Effective Intake Interviews," James R. Warren, No. 1, Jan./Feb., pp. 40–48.

"Guardian: An Intelligent Autonomous Agent for Medical Monitoring and Diagnosis," Jan Eric Larsson and Barbara Hayes-Roth, No. 1, Jan./Feb., pp. 58–64.

"Guest Editor's Introduction: AI and the Changing Face of Health Care," Erika Rogers, No. 1, Jan./Feb., pp. 20–25.

"Knowledge Architectures for Patient Access to Breast-Cancer Information," Colleen Crangle, Robert Carlson, Lawrence Fagan, Mark Erlbaum, David Sherertz, and Lauren Langford, No. 1, Jan./Feb., pp. 26–31.

"Neural Net Learning for Intelligent Patient-Image Retrieval," Olivia R. Liu Sheng, Chih-Ping Wei, and Paul Jen-Hwa Hu, No. 1, Jan./Feb., pp. 49–57.

"TraumaTIQ: Online Decision Support for Trauma Management," Abigail S. Gertner and Bonnie L. Webber, No. 1, Jan./Feb., pp. 32–39.

Autonomous Space Vehicles

"Analytic Verification of Flight Software," Michael Lowry and Daniel Dvorak, No. 5, Sept./Oct., pp. 45–49.

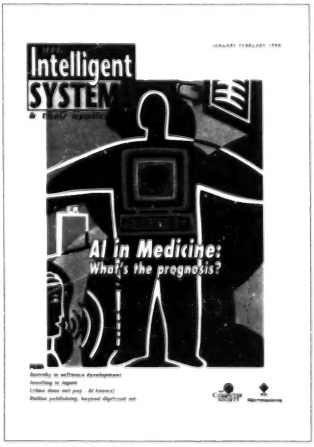
"Automated Planning and Scheduling for Goal-Based Autonomous Spacecraft," Steve Chien, Nicola Muscettola, Kanna Rajan, Benjamin Smith, and Gregg Rabideau, No. 5, Sept./Oct., pp. 50–55.

"Guest Editor's Introduction: Spacecraft Autonomy and the Missions of Exploration," Richard J. Doyle, No. 5, Sept./Oct., pp. 36–44.

"The Impact of Autonomy Technology on Spacecraft Software Architecture: A Case Study," Edward B. Gamble, Jr., and Reid Simmons, No. 5, Sept./Oct., pp. 69–75.

"Onboard Science Data Analysis: Applying Data Mining to Science-Directed Autonomy," Paul Stolorz and Peter Cheeseman, No. 5, Sept./Oct., pp. 62–68.

"Smart Executives for Autonomous Spacecraft," Erann Gat and Barney Pell, No. 5, Sept./Oct., pp. 56–61.



Configuration

"A Configuration Tool to Increase Product Competitiveness," Bei Yu and Hans Jørgen Skovgaard, No. 4, July/Aug., pp. 34–41.

"Configuring Large Systems Using Generative Constraint Satisfaction," Gerhard Fleischanderl, Gerhard E. Friedrich, Alois Haselböck, Herwig Schreiner, and Markus Stumptner, No. 4, July/Aug., pp. 59–68.

"Guest Editors' Introduction: Configuration," Boi Faltings and Eugene C. Freuder, No. 4, July/Aug., pp. 32–33.

"An Industrial-Strength Description Logic-Based Configurator Platform," Deborah L. McGuinness and Jon R. Wright, No. 4, July/Aug., pp. 69–77.

"Product Configuration Frameworks: A Survey," Daniel Sabin and Rainer Weigel, No. 4, July/Aug., pp. 42–49.

"Sales Configuration in Business Processes," Albert Haag, No. 4, July/Aug., pp. 78–85.

"Using Resource Balancing to Configure Modular Systems," Werner E. Juengst and Michael Heinrich, No. 4, July/Aug., pp. 50–58.

Expert Systems

"Remote Instrument Diagnosis on the Internet," Nicholas H.M. Caldwell, Bernard C. Breton, and David M. Holburn, No. 3, May/June, pp. 70–76.

Feature Transformation & Subset Selection

"Data-Driven Constructive Induction," Eric Bloedorn and Ryszard S. Michaelski, No. 2, Mar./Apr., pp. 30–37.

"Feature Space Transformation Using Genetic Algorithms," Haleh Vafaie and Kenneth De Jong, No. 2, Mar./Apr., pp. 57–65.

"Feature Subset Selection Using a Genetic Algorithm," Jihoon Yang and Vasant Honavar, No. 2, Mar./Apr., pp. 44–49.

"Feature Transformation by Function Decomposition," Blaz Zupan, Marko Bohanec, Janez Demsar, and Ivan Bratko, No. 2, Mar./Apr., pp. 38–43.

"Guest Editors' Introduction: Feature Transformation and Subset Selection," Huan Liu and Hiroshi Motoda, No. 2, Mar./Apr., pp. 26–28.

"Novel Methods for Subset Selection with Respect to Problem Knowledge," Pavel Pudil and Jana Novovicová, No. 2, Mar./Apr., pp. 66–74.

"A Relevancy Filter for Constructive Induction," Nada Lavrac, Dragan Gamberger, and Peter Turney, No. 2, Mar./Apr., pp. 50–56.

Intelligent Monitoring Systems

"Forecast: A Neural System for Diagnosis and Control of Highway Surfaces," Antonio Luchetta, Stefano Manetti, and Franco Francini, No. 3, May/June, pp. 20–26.

Knowledge Management

"Guest Editor's Introduction: Knowledge Management Systems: Converting and Connecting," Daniel E. O'Leary, No. 3, May/June, pp. 30–33.

"Toward a Technology for Organizational Memories," Andreas Abecker, Ansgar Bernardi, Knut Hinkelmann, Otto

Kühn, and Michael Sintek, No. 3, May/June, pp. 40–48.
"Using AI in Knowledge Management: Knowledge Bases and Ontologies," Daniel E. O'Leary, No. 3, May/June, pp. 34–39.

Planning Systems

"IMACS: A Case Study in Real-World Planning," Satyandra K. Gupta, Dana S. Nau, and William C. Regli, No. 3, May/June, pp. 49–60.

Simulation

"Automatic Revision of Simulation Models," Anita Pos, Hans Akkermans, and Jan Top, No. 2, Mar./Apr., pp. 75–81.

Vision-Based Driving Assistance

"Autonomous Driving Goes Downtown," Uwe Franke, Dariu Gavrila, Steffen Görzig, Frank Lindner, Frank Paetzold, and Christian Wöhler, No. 6, Nov./Dec., pp. 40–48.
"Guest Editor's Introduction: Vision-Based Driving Assistance," Alberto Broggi, No. 6, Nov./Dec., pp. 22–23.
"Machine-Vision Systems for Intelligent Transportation Systems," Ichiro Masaki, No. 6, Nov./Dec., pp. 24–31.
"Robust Course-Boundary Extraction Algorithms for Autonomous Vehicles," Chris Roman and Charles Reinholtz, No. 6, Nov./Dec., pp. 32–39.
"Sensor and Information Fusion for Improved Vision-Based Vehicle Guidance," Robin R. Murphy, No. 6, Nov./Dec., pp. 49–56.
"Techniques for Autonomous, Off-Road Navigation," Stefan Baten, Robert Mandelbaum, Michael Lützeler, Peter J. Burt, and Ernst D. Dickmanns, No. 6, Nov./Dec., pp. 57–65.
"Wavelet Transform for Analyzing Fog Visibility," Christoph Busch and Eric Debes, No. 6, Nov./Dec., pp. 66–71.

New Directions

"Biology: see it again—for the first time," Sean Luke, Shugo Hamahashi, Koji Kyoda, and Hiroki Ueda, No. 5, Sept./Oct., pp. 6–8.
"Coordination and learning in multirobot systems," Maja J. Mataric, No. 2, Mar./Apr., pp. 6–8.
"Making peace with your multimedia," Sibel Adali, No. 6, Nov./Dec., pp. 7–10.
"Self-reconfiguring robots," Daniela Rus, No. 4, July/Aug., pp. 2–4.
"When robots meet people," Sebastian Thrun, No. 3, May/June, pp. 27–29.

News

"GA aims for the final frontier," No. 2, Mar./Apr., p. 83.
"Laser restoration with neural nets," No. 1, Jan./Feb., pp. 84–85.
"Neural nets help improve railway-crossing conditions," No. 1, Jan./Feb., p. 84.
"Smart planes are safer planes," No. 1, Jan./Feb., p. 84.

Roundtable

"Improving the product-realization process," Bruce A. Ambler, No. 4, July/Aug., p. 29.
"Managing and sharing product knowledge to improve customer satisfaction," Bob Phillips, No. 4, July/Aug., p. 31.
"New ways to improve business-process effectiveness," David Franke, No. 4, July/Aug., pp. 29–30.
"The role of configuration knowledge in the business process," Eugene C. Freuder, No. 4, July/Aug., p. 29.
"The use of constraint programming for configuration knowledge representation," Daniel Mailharro and Jean-Francois Puget, No. 4, July/Aug., p. 30.

Spotlight

"CMU's autonomous helicopter explores new territory," John Charles, No. 5, Sept./Oct., pp. 85–87.

Trends & Controversies

"Applying SVMs to face detection," Edgar Osuna, No. 4, July/Aug., pp. 23–26.
"The Ariadne approach to Web-based information integration," Craig A. Knoblock and Steven Minton, No. 5, Sept./Oct., pp. 17–20.
"Building coherent plots in interactive fiction," Janet H. Murray, No. 6, Nov./Dec., pp. 18–21.
"Character-based interactive story systems," Barbara Hayes-Roth, No. 6, Nov./Dec., pp. 12–15.
"Code synthesis as enabling technology for mass customized agents," Peter Norvig, No. 2, Mar./Apr., pp. 9–12.
"The engineering sketch," Thomas F. Stahovich, No. 3, May/June, pp. 17–19.
"Graphical modeling for complex stochastic systems: the BUGS project," David Spiegelhalter and Andrew Thomas, No. 2, Mar./Apr., pp. 14–15.
"How can we get high-quality electronic journals?" Michael Lesk, No. 1, Jan./Feb., pp. 12–13.
"How to implement SVMs," John Platt, No. 4, July/Aug., pp. 26–28.
"Informal user interfaces for natural human-computer interaction," James A. Landay, No. 3, May/June, pp. 14–16.
"Information integration," Marti A. Hearst, No. 5, Sept./Oct., p. 12.
"The Information Manifold approach to data integration," Alon Y. Levy, No. 5, Sept./Oct., pp. 12–16.
"Innovations in electronic academic publishing," Marti A. Hearst, No. 1, Jan./Feb., pp. 6–7.
"Interactive fiction," Haym Hirsh, No. 6, Nov./Dec., p. 12.
"Interactive fiction: the story is just beginning," Andrew Stern, No. 6, Nov./Dec., pp. 16–18.
"JAIR: an electronic journal by and for the AI research community," Michael P. Wellman and Steve Minton, No. 1, Jan./Feb., pp. 7–9.
"Medical publishing meets AI," Ida Sim, No. 1, Jan./Feb., pp. 10–12.
"Meta-Amphion: cost-effective development of high-assurance software generators," Jeffrey Van Baalen, No. 2, Mar./Apr., pp. 12–13.
"The proverbial back of an envelope," Mark D. Gross, No. 3, May/June, pp. 10–13.
"Sketching intelligent systems," Marti A. Hearst, No. 3, May/June, p. 10.
"Support Vector Machines," Marti A. Hearst, No. 4, July/Aug., p. 18.
"SVMs: a practical consequence of learning theory," Bernhard Schölkopf, No. 4, July/Aug., pp. 18–21.
"Using SVMs for text categorization," Susan Dumais, No. 4, July/Aug., pp. 21–23.
"The Whirl approach to information integration," William W. Cohen, No. 5, Sept./Oct., pp. 20–24.
"Will domain-specific code synthesis become a silver bullet?" Wray Buntine, No. 2, Mar./Apr., p. 9.

World Impact

"Autonomy in space," Crystal Chweh, No. 5, Sept./Oct., pp. 78–80.
"Jousting in Japan," Julio Rosenblatt, No. 1, Jan./Feb., pp. 14–19.
